

# pSCANNER

## Security and Privacy Panel

Tsung-Ting Kuo, Jason Doctor, and Toan Ong  
pSCANNER Face-to-Face Meeting  
October 13, 2016

- Biomedical data are often hosted in local enclaves but it is non-trivial to share them due to privacy and policy concerns.
- Modern analytic methods often need the ability to operate on data of different sources and modalities.
- Security and privacy are major concerns in cross-institutional collaboration.

- **ModelChain: Decentralized Privacy-Preserving Healthcare Predictive Modeling Framework on Private Blockchain Networks**
