Work Plan:
Data Characterization Query Package

March 23, 2016
v3.01

History of modifications

Work plan date	Code version	Description
March 17, 2016	v3.01	Corrected truncation of some query results by increasing field lengths. In VITAL_L3_HT, height categories of "<0" and "0-10" were both displaying as "0-10" due to a precision issue with PROC FORMAT/PROC MEANS; this was corrected. In PRO_L3_PXDATE_Y was incorrectly labeled ADMIT_DATE; this was corrected to PX_DATE. Updated all documentation and code to v3.01.
March 23, 2016	v3.01	Incorporated revised ETL ADD template and revised related instructions.
